

5. Packing/Bundling

Material to be adequately dunnaged aboard ship with minimum 100 mm thick timbers to allow easy access for slinging. Ideally vertical gap of 75mm-100mm between every group of 4 bundles.

In bare bundles of approximately one metric tonne for six metre lengths and two Metric Tonnes for each twelve metre & fourteen metre lengths respectively.

Securely tied with adequate wire rod or signode straps with lifting bonds. (Certificate to be provided for the lifting bonds tensile strength)

6. Colour code

Each diameter and length to be colour marked – a different colour to be used for each size and specified both in mills packing list and as part of the "marks".

7. Labelling

Each bundle to have minimum of 3 securely affixed labels stipulating origin, weight, size, cast no/ heat number, 'RONLY' bearing the Cares Logo. Labels to be sufficiently robust as to remain legible after handling and storage for up to 18 months

8. Shipment
